

UNIFLEX CNC Metalltechnik GmbH
www.uniflex-cnc.de

Company

Founded in 2000, UNIFLEX CNC Metalltechnik GmbH is a medium-sized company in the field of machining and manufacturing components. With a small dedicated team, the company works in the areas of 5-axis milling, turning and grinding of complex metal parts and the assembly of assemblies. The metal parts, manufactured with the latest technology and with the highest precision, are assembled in the press machines from UNIFLEX Hydraulik GmbH. Our products are used in world-renowned companies such as Caterpillar or Parker. By working in shifts, customer requests can be implemented flexibly and quickly and a wide range of services with drawing Profile, cast parts and flame cut parts can be offered.

Cutting machine operator (m/f/d)

Your tasks and responsibilities

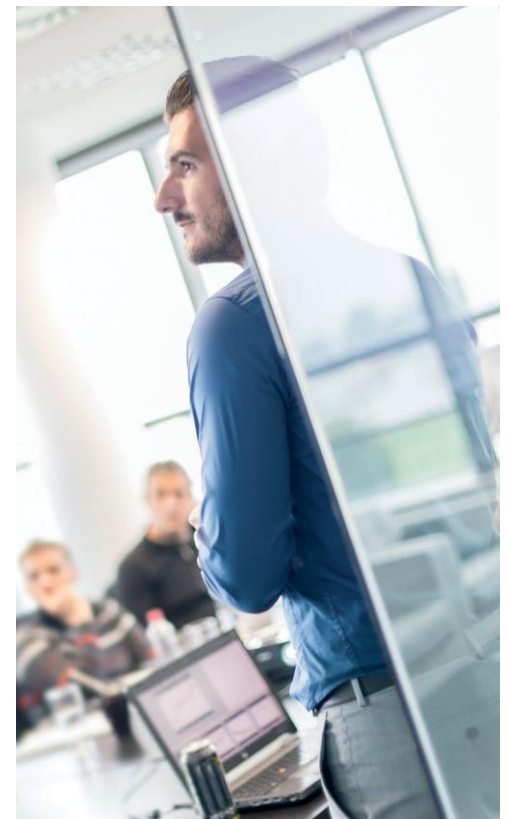

- Reading and applying technical drawings, work plans and programs
- Manufacture of technical parts according to construction plans
- Monitoring and optimization of manufacturing processes
- Independent programming on CNC controls (Mazak, Heidenhain and Siemens)
- Measuring and setting up the machining tools
- Production and optimization of sample parts, development components and initial series
- Safe and reliable verification of the target and actual values of parts in ongoing production
- Keeping batch documentation and test protocols
- Carrying out minor repairs and maintenance work
- Deburring and cleaning of components and workpieces
- Safe handling of measuring equipment

Your Profile

- Qualified specialist training as a cutting machine operator or several years of experience
- Willingness to work in a 3-shift system
- Independent, self-reliant work, as well as enjoyment of working in a team
- Manual dexterity, technical understanding, flexibility and reliability

We offer you

- An indefinite employment relationship
- Responsible and varied tasks in an equally traditional, dynamic and innovative company
- Training
- Complimentary lunch twice a week
- A secure, future-oriented job with opportunities for development and advancement
- Performance-related remuneration, company pension scheme and annual bonus
- "Hands-on tasks" – no corporate policy, flat hierarchical structures, fast communication
