

Company

Founded in 2000, UNIFLEX CNC Metalltechnik GmbH is a medium-sized company in the field of machining and manufacturing components. With a small dedicated team, the company works in the areas of 5-axis milling, turning and grinding of complex metal parts and the assembly of assemblies. The metal parts, manufactured with the latest technology and with the highest precision, are assembled in the press machines from UNIFLEX Hydraulik GmbH. Our products are used in world-renowned companies such as Caterpillar or Parker. By working in shifts, customer requests can be implemented flexibly and quickly and a wide range of services with drawing Profile, cast parts and flame cut parts can be offered.
